LANGUAGES

Chinese (Native)

English (Professional)

CAREER PROFILE

As a Full Stack Developer with 5 years of experience in software development, I've acquired a diverse set of skills with a main focus on JavaScript and its vast ecosystem. React and NodeJs are the main tools I use to create robust and modern web applications. The different kinds of projects I've contributed to led me to use lots of various technologies and taught me how to best adapt to new situations, whether technically or socially.

EXPERIENCES

Self employed Full Stack Developer
2018 - Present

HongKong, China

I am working as a self employed full stack web developer.
I work by contact with companies or contribute to developer team as a full stack developer.

Full Stack Developer
2020.4 - 2020.11

AlphaSwap, London

I worked in AlphaSwap company and my direct client was Vladimir Agaev, the CTO of this company.
AlphaSwap is an investment technology platform, bundling the community's best stock ideas into Data-as-a-Service.
I had to build entire website of this company from startup.

Freelance Full Stack Developer
2017.3 - 2020.3

Upwork.com

I have done tons of works from simple app to complex project.
These jobs required me to :
1. Fixing bugs.
2. Rewrite and refactor existing code to make it maintainable
3. Build company's website.
. . .

Freelance Front End Developer
2019.8 - 2020.1

Guru.com

I worked as a part time front end developer.
Most of works are related to front end development, such as building website UI, CSS fix, Drawing in the Canvas, etc...

Web Developer
2017.4 - 2018.9

Hong Kong Kenxinda Technology Co., Ltd

After graduation, I worked in this company as a web developer.
My career as a web developer was started from this job.

PROJECTS

Main projects I have completed are listed below.

Project One - AlphaSwap company website
If you check the url of this company, you could find me there.
https://www.alphaswap.io/about-us
Tech : React-Redux, Nest.js, AWS Amplify, , API Gateway,, Serverless Architecture

Project Two - Rosetta-technology website
I participated in this project as a front-end developer of develop team.
https://portal.cdm.rosetta-technology.io/#/login.
Tech : Angular 6+, CSS animations, Azure DevOps, Microsoft Teams

Project Three - Racing Manager website
I worked as backend developer with my colleagues.
https://theracingmanager.com/
Tech : React, NodeJS, Data Science

Project Four - LiquidBlox website
I worked as a front end developer
https://www.liquidblox.com/.
Tech : React, NodeJS, MySQL, Azure DevOps, Microsoft Teams

Project Five - Drawing glass templates in the Canvas, SVG
This project required
heavy use of SVG objects and the creation of a custom edition tool with touch gestures.
