## Senior Full Stack Engineer

**Frontend-focused** Full Stack Engineer with 10+ years of experience designing, developing, and optimizing **full-featured web applications**. Specialized in modern JavaScript frameworks (**React, Vue, Angular**) for building interactive, user-centric **frontends**, and proficient in **backend** development with **Node.js, Python, and Java**, including RESTful APIs, database integration, and microservices architectures

### Core Skills

JavaScript (React.js, Next.js, Vue.js, Angular), TypeScript, HTML5, CSS3, TailwindCSS, DaisyUI, Storybook, API Integration, Node.js, Python (Django, FastAPI), PHP (Laravel, Yii)

### Additional Skills

React Native, Electron, Ionic, Git, MongoDB, PostgreSQL, SQL, AWS (ECS, Lambda, RDS, S3), Jenkins, GitHub Actions Webpack, Docker, Microservices, RESTful APIs, GraphQL, OAuth/JWT Authentication, Azure, Google Cloud, Blockchain Integrations (Solidity, Hyperledger),

## Professional Experience

**Senior Full-Stack Engineer | LimeSurvey | Hamburg, Germany (Remote)**
Feb 2024 – Mar 2025

- Contributed to LimeSurvey's open-source **full-stack platform**, focusing on both backend (**PHP Yii framework**) and frontend (**React, Storybook**) development.
- Developed and maintained dynamic user interfaces in React, enhancing survey creation, response tracking, and data visualization for users.
- Optimized backend integrations and frontend data handling for complex survey logic, reducing load times and improving user interaction.
- Led the implementation of **Storybook** for UI component development, improving collaboration between frontend and backend teams.
- Ensured seamless user experience by collaborating closely with frontend and backend teams for real-time survey data reporting and export features.

### Senior Frontend Engineer | PillarMarkets | NY, US (Remote)
Jan 2022 – Feb 2024

- Led the development of frontend (**Next.js, DaisyUI, GraphQL, TailwindCSS**) services to enhance platform performance and user experience.
- Designed and implemented highly interactive and responsive user interfaces using **Next.js** and **TailwindCSS**, driving improved user satisfaction and platform adoption.
- Built scalable RESTful APIs consumed by **Next.js** frontend and mobile applications, integrating frontend with secure backend services.
- Worked on integrating frontend with backend services for **CRM**, analytics, and investor management, ensuring seamless data flow and real-time analytics.
- Contributed to frontend UI/UX improvements using **DaisyUI**, ensuring consistency and usability across platform.

### Senior Frontend & Mobile Engineer | The Track App | NY, US (Remote)
Dec 2020 – Jan 2022

- Led the development of a **cross-platform productivity and calendar application** built with **React, React Native, Electron, and Swift**, enabling seamless scheduling and collaboration across desktop and mobile.
- Implemented advanced **calendar integrations** with **Google Workspace, Microsoft Teams, and Outlook**, allowing users to sync, view, and manage events from multiple providers in real time.
- Built and optimized reusable UI components with **React** and **TailwindCSS**, ensuring consistent design and performance across web, desktop, and mobile platforms.
- Developed **Electron-based desktop features** such as notifications, offline event caching, and deep links, enhancing productivity for business users.
- Collaborated closely with backend engineers to design **GraphQL and REST APIs** for unified event management, authentication (OAuth2), and cross-platform data synchronization.

### Full-Stack Engineer | AlphaSwap |London, UK (Remote)
Apr 2019 – Nov 2020

- Designed and developed full-stack applications using **React** for frontend and **Node.js** for backend services, powering blockchain-based educational platforms.
- Implemented interactive user interfaces in **React** for digital signature verification and secure authentication, ensuring a seamless user experience.
- Collaborated with blockchain teams to ensure smooth data exchange protocols between frontend and backend services.
- Designed backend APIs and services to support **blockchain**-based identity modules for educational platforms.
- Implemented digital signature verification and secure authentication flows.
- Optimized backend database design for large user imports and verification processes.
- Collaborated with blockchain teams to define data exchange protocols across services.

## Education

Dalian University

Bachelor of Computer Science | Aug 2012 – May 2016
